Mermaid - Our Family in Paradise—Philip Rink 2002 Here is an idea: This spring, fly to St. Martin or one of the other Caribbean islands and buy a sailboat. Then, next Halloween (or so) pack up the family and move on to the boat for the winter. You and your family can spend the first month learning to sail, then explore the islands, home-school the kids, and enjoy tropical living. If things go well, when you return home and sell the boat you might even make enough to pay for the trip. Sound far-fetched? This family of four from Camano Island, Washington did exactly that. Overcoming a lack of sailing and cruising experience with research, good advice and attitude, they had a great time and a great adventure as they sailed the Caribbean and the Bahamas. Also, the Washington companion video is now available here on Amazon.com. Reviews: Although the Rinks had raised their children power boating in the Northwest, the family learned together how to sail in the Caribbean. By the end of the six-month-long adventure, the family had anchored out every night but two, and made ocean passages as long as five nights. - We challenged ourselves in meaningful ways that brought us together as a family. The whole idea of the video and book is to share how other families can experience this kind of great adventure. - SEA, May 2003Although the Rinks had raised their children power boating in the Northwest, the family learned together how to sail in the Caribbean. High Latitude Sailing—Jon Amtrup 2020-09-03 Sailing in cold waters is challenging, but hugely rewarding. And when you venture into the high latitudes you find yourself in some of the world’s last real wildernesses. In recent years climate change has made these regions more accessible to small boats, and it is now possible to venture further afield in search of adventure. With practical advice, stunning photography and first-hand accounts of voyages from world-renowned experts, this book offers hard-won wisdom on all aspects of sailing in cold waters:
Preparing yourself: good routines, assessing risk and preparing your crew · Preparing your boat: design, heating, engine, steering, anchors and electrics · Sailing in ice: instrumentation, charts, and what to do when you get stuck · Safety: MOB, polar bears, glaciers and dingly procedure · Communication: VHF, satellite and SSB · Weather: interpreting GRIB files and reading ice charts · Anchoring and mooring: types and numbers of anchors and mooring lines · Clothes: hiking and skiwear; the three-layer principle · Cruising areas: Svalbard, Antarctica, South Georgia and many more Whether it’s tackling the North-West Passage aboard your own yacht or a more modest voyage, heading to Antarctica or keeping your boat in the water for the quieter and often more beautiful winter season, this book is essential reading for all sailors preparing for enjoyable and safe sailing in cold waters.

Upgrading Your Boat’s Interior—Mike Westin 2013-04-12 The second in a series of highly practical, hands-on, step-by-step photographic manuals, Upgrading Your Boat’s Interior fills a gap in the market for the DIY boat builder and repairer. It is a subject covered only in piecemeal fashion by the yachting press, which, like general boat maintenance and repair manuals, can’t go into the level of detail Mike Westin does. This is a visual, hand-holding guide, dwelling on the practical details of upgrading every aspect of a tired boat’s interior and related systems as it explains each procedure rather than focussing on the theory (which is relegated to an appendix, for those who wish to go further). It’s surprising how a few simple renovations and upgrades can transform the look and comfort of a cabin. Anyone planning to attempt these projects will find this photographic step-by-step book a hand-holding godsend.

I feel Mark Nicholas has done extensive study in gaining a worldwide appreciation and understanding of what it takes, not only to buy a boat and maintain it, but what one can expect within that lifestyle…. the challenges, adjustments, financial expectations as well as the joys inherent in this experience. Mark has probably done the most complete investigation and reporting of any we know of. Maybe living aboard is not for everyone, but you are not signing your life away, even if you just want to enjoy it for a limited time. There is just no comparison to sitting within 4 walls when one considers either cruising in open waters, or just sitting idly by on the deck or cockpit, with open breezes and the sun warming your back, listening to the birds, slap of the water on the hull, or other activities around you. This even works when rain is gently falling beyond. There are also those challenges with weather…you against the elements. You are both above and within nature at its best. God surely meant it to be that way.- Don Stonehill, Chairman, Liveaboard Assn of Puget Sound
